Method of Calculation of Net Asset Value:

The Unit Price (UP) of a fund will be set by dividing the Value of the assets in the fund at the valuation time (at the end of the day) by the number of units. For new business, units will be allocated depending on the price of the units using the closing NAV on the day of collection of cash/local cheque/DD, date of credit to our account in case of direct debit and day of realization in case of outstation cheque or policy issue whichever is later. For subsequent payments of premium if cash / local cheque / DD / direct debit is received in the office of the company by 3.00 p.m., the closing NAV of the day on which premium is received would be applicable. In case premium by local cheque/ DD / direct debit is received in the company after 3.00 p.m. closing NAV of the next business day shall be applicable. In case of outstation cheque/DD, closing NAV of the day of realization will be applicable

The Net Asset Value (NAV) of each of the Funds will be computed at the end of the day (on daily basis). The NAV would be calculated on appropriation basis or expropriation basis depending on whether the company is purchasing or selling the assets in order to meet the day to day transactions of Unit allocations and Unit redemptions. The resulting price will be rounded to the nearest Rs 0.0001. NAV (Appropriation/Expropriation) would be calculated as under:

	Market/Fair value of the fund's investments + Expenses incurred in the purchase of the assets + Value of any current assets + any accrued income net of fund management charge - the value of any current liabilities less provisions
NetAsset Value	=
(Appropriation price)	Number of existing units at the valuation date (before any new units are allocated)
	Market/Fair value of the fund's investments - Expenses incurred in the sale of the assets + Value of any current assets + any accrued income net of fund management charge - the value of any current liabilities less provisions
Net Asset Value	=
(Expropriation price)	Number of existing units at the valuation date (before any units are redeemed)
